

Appendix

(From OCC Third Party Risk Bulletin 2013-29)

An effective third-party risk management process follows a continuous life cycle for all relationships and incorporates the following phases:

Planning: Developing a plan to manage the relationship is often the first step in the third-party risk management process. This step is helpful for many situations but is necessary when a bank is considering contracts with third parties that involve critical activities.

Due diligence and third-party selection: Conducting a review of a potential third party before signing a contract⁵ helps ensure that the bank selects an appropriate third party and understands and controls the risks posed by the relationship, consistent with the bank's risk appetite.

Contract negotiation: Developing a contract that clearly defines expectations and responsibilities of the third party helps to ensure the contract's enforceability, limit the bank's liability, and mitigate disputes about performance.

Ongoing monitoring: Performing ongoing monitoring of the third-party relationship once the contract is in place is essential to the bank's ability to manage risk of the third-party relationship.

Termination: Developing a contingency plan to ensure that the bank can transition the activities to another third party, bring the activities in-house, or discontinue the activities when a contract expires, the terms of the contract have been satisfied, in response to contract default, or in response to changes to the bank's or third party's business strategy.

In addition, a bank should perform the following throughout the life cycle of the relationship as part of its risk management process:

Oversight and accountability: Assigning clear roles and responsibilities for managing third-party relationships and integrating the bank's third-party risk management process with its enterprise risk management framework enables continuous oversight and accountability.

Documentation and reporting: Proper documentation and reporting facilitates oversight, accountability, monitoring, and risk management associated with third-party relationships.

Independent reviews: Conducting periodic independent reviews of the risk management process enables management to assess whether the process aligns with the bank's strategy and effectively manages risk posed by third-party relationships.
